

TANGRAM GROUP OF COMPANIES

TANGRAM CANADA INC.

TANGRAM INTERNET
SERVICES GMBH

TANGRAM UKRAINE LTD

Dear Sirs,

My name is Alexander Tsebro. I am the CTO and co-owner of the Tangram group of companies.

I would like to propose to your company a long term cooperation and partnership with our group of companies in the areas of web development, software development, managed services (remote managing servers and networks) and 24/7 technical support. We have very strong technical team in our technical offices in Ukraine and we would like operate as your sub-contractor.

We realize that you have your own technical specialists but if, from time to time, you do not have sufficient resources "in-house" to handle all of incoming projects we stand ready to assist. Our clients think of us as an extension of their in-house IT team. Should you decide to outsource your projects to us, you will save quite a bit of money while receiving the better level of quality. In short, it is a win-win strategy.

We employ highly qualified technical specialists (software developers and system administrators) in Ukraine to reach optimal results and reduce project expenses and we can provide qualified PM (project managers) who has a solid experience with customers from North America and Europe. Some of our PM (project managers) located in our offices in Canada and some in our European offices and it is what we consider as our competitive advantage because our clients can work with our PM (project managers) in customer's time zone.

OUR HOURLY RATES

Usually we work with clients on hourly basis. Our average hourly rate is US\$25.00 per hour but for senior specialists the rate is US\$35-50.00 per hour. See below hourly rates for our specialists:

Junior Developer \ Junior System Administrator	~ US\$ 20.00 – 25.00 per hour;
Middle Developer \ System Administrator	~ US\$ 25.00 – 35.00 per hour;
Senior Developer \ Senior System Administrator	~ US\$ 35.00 – 50.00 per hour.

If we reach a cooperation agreement with your company, you will have the option of signing the contract with any of our companies (e.g. Tangram Ukraine Ltd. in Ukraine, Tangram Canada Inc. in Canada or Tangram Internet Services GmbH in Germany).

You can find more information about the advantage of cooperation with our group of companies at our web sites.

I would be pleased to discuss your needs and projects as well as your vision of possible cooperation with our group of companies. Meanwhile if you require further information please do not hesitate to contact me by Email, Skype or phone (see my contact information below).

If you choose our team, you will get reliable partner with the skilled technical specialists and the skilled management, with good quality of services and prompt communication.

**Your faithfully,
Alexander Tsebro
CTO / Co-owner of the Tangram group of companies**

WHY YOU SHOULD CHOOSE OUR TECHNICAL TEAM?

Why use us? For all of the following reasons:

1) Our team has valuable experience in outsourced web development, software development, managed services (remote managing servers and networks) and round-the-clock (24/7/365) technical support.

2) The cost of our services is not higher than work with any individual freelancer.

3) If you decide to outsource your projects to our technical team in Ukraine, you will receive Canadian standards of quality because our technical team works a lot for Canadian customers. In addition, our people have a great deal of experience working with customers from different countries and guaranteeing the quality of the finished projects in time and on budget.

4) You will be always covered by our own "Tangram warranty"!

Usual our warranty cover next situations:

- if our Developer \ System Engineer did mistake and he did not request all materials from customer at the beginning of project, we cover extra hours needed for development as our own expenses;
- we do not increase budget of project more than for 25-30% even if we face some complexity during implementation/development;
- we provide 'bug free' warranty i.e. if something happen with developed scripts/application/ project within 2 months after finishing of this project, We will fix it FOR FREE.

As you see you have chance to hire a reliable contractor for your project i.e. you protected by our own "Tangram warranty" and it means that even during next 2 month after finishing of this project you will be able get some consultations / assistance from us FOR FREE.

5) We can assign dedicated account manager for your company. Some of our PM (project managers) located in our offices in Canada and some in our European offices and it is what we consider as our competitive advantage because our clients can work with our PM (project managers) in customer's time zone.

6) We have exceptional knowledge in the technologies used in your projects!

50% of our business is web development and software development and another 50% of our business is managed services and hosting services (cloud based solutions, collocation services, dedicated and VPS/VDS (virtual servers) for rent) in the best European and North American data centers.

In the field of web and software development our main specialization is LAMP stack technologies (Linux, Apache, MySQL, PHP), MERN stack technologies (MongoDB, Express.js, React.js, Node.js) and MEAN stack technologies (MongoDB, Express.js, Angular, Node.js) but our developers have experience with Python and .NET technologies. In PHP development our developers have in depth experience with different PHP Frameworks such as Zend, Symfony, Laravel, Yii, CodeIgniter, CakePHP as well as with different open source solutions (e.g. Magento E-commerce platform, WordPress, Drupal, etc.).

Another area of expertise is managed services. We provide a full range of managed networking services, including system administration, technical support of web servers and network equipment worldwide, executed by our team of experts. Our technical support experts can protect your end-to-end network and web servers 24/7 so you can be free of that worry. We proactively monitor web servers for security breaches and vulnerabilities. Our experts destroy bugs and viruses, and fix holes before you even know there's a problem. Among our clients is a successful North American Internet TV project. At present we manage remotely more than 300 web servers and network routers in six datacenters covering four countries.

In the field of providing managed services we have experience with technologies covering different types of virtualization (Virtuozzo, OpenVZ, KVM, XEN, VMware, Hyper-V), different distributions of OS Linux / OS Unix and OS MS Windows Server systems, VPN/DNS/IPTables/Firewalls/web servers/mail servers configuration and tuning etc. In addition, we have good experience with cloud based solutions. For our customers we provide cloud based solutions (e.g. configuration and technical support of Private Clouds) in the best European and North American data centers.

In the field of providing hosting services we provide next services in the best European and North American data centers:

- Cloud based solutions (e.g. configuration and technical support of Private Clouds);
- Collocation services, the providing for rent dedicated and VPS/VDS (virtual servers);
- Shared Hosting;
- Domain names registration services in more than 100 international zones;
- SSL Certificates selling and supporting SSL certificates for banks, cell phone service operators and other companies.

7) We can provide round-the-clock (24/7/365) technical support i.e. we have System Engineers on duty 24 hours per day, while if you hire individual freelancer as a contractor for your project he will not be able to guarantee you availability 24 hours a day.

At this moment we have good technical support based on team of 8 qualified System Administrators and 2 (two) of them are Senior System Administrators i.e. System Administrators with Level3 experience. One of these Senior System Administrators is a kernel contributor to one of popular Linux distributives.

One of our main areas of expertise is Managed Services! We provide a full range of Managed Networking Services, including System Administration, Technical Support of web servers and network administration.

Our team has an experience with web hosting industry from 2002 year when we launched own HSP (Hosting Service Provider) under trade mark 'Tanhost' in Ukraine and Russia. See our "hosting" sites: <http://tanhost.ua/>, <http://tanhost.ru>, <http://tanhost.com> Our hosting provider 'Tanhost' grown from 2002 year and now we own and provide for rent more than 300 servers located in six datacenters of six countries of world. We manage servers located in datacenters of USA, Canada, Netherlands, Germany, Ukraine, Russia.

8) As one of the divisions of our group provides system integration services, quite often our large corporate clients interested in “one source” comprehensive services so they often order comprehensive maintenance services for company's IT infrastructure. For example, we provide hosting services (cloud based solutions, collocation services, dedicated and VPS/VDS (virtual servers) for rent) in the best European and North American data centers, solutions in the field VOIP telephony and video conferencing, solutions in the field of IPTV and VoD (video on demand), and integration services of heterogeneous information systems of the company into a single information system.

FEATURED PROJECTS FOR VIP CLIENTS

ONE OF OUR LATEST PROJECTS

<p>Ukrainian exporters</p> <p>URL: https://uatrade.info/</p> <p>Duration: 1 month (01.10.2018 – 31.10.2018),</p> <p>Number of hours: ~ 1800 hours</p> <p>Details of the project: We won the tender organized by EPO (Export Promotion Office) – see http://epo.org.ua on behalf of Ukrainian government and successfully implemented this project within very tight terms (in fact, we started the work on this project at October 01, 2018 and successfully completed this project at October 31, 2018).</p> <p>The main goal of this web portal was the presentation of Ukrainian exporters at the international exhibition China International Import Expo 2018 in Shanghai, China. This international exhibition was held from November 05, 2018 till November 10, 2018. The end customer of this project was EPO (Export Promotion Office) but the financing of this project was carried out by EBRD (European Bank for Reconstruction and Development) through the Non-governmental Union "Foundation for support of reforms in Ukraine" (https://fsr.org.ua/).</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP7), PHP Framework Laravel, Vue.js, OOP, MVC, GIT, SQL, HTML5, CSS, JavaScript, DOM, XML, SPA</p>	<p>Export Promotion Office , NGU "Foundation for support of reforms in Ukraine" (Kyiv, Ukraine)</p>
--	--

Over the years our team has developed more than several hundred Internet projects. Some of our previous projects can be seen in our portfolio. Following is a description of some of our featured projects:

URL / BRIEF DESCRIPTION	CUSTOMER
OUR FEATURED PROJECTS	
<p>The system of statistics for soccer matches</p> <p>URL: https://www.parimatch.com/en/</p> <p>Duration: 7 months (10.2018 – 04.2019)</p> <p>Number of hours: ~ 550 hours</p> <p>Details of the project: For the one of leading sports betting companies in the CIS countries Parimatch (https://Parimatch.com), we developed a very complicated system of statistics based on the results of soccer matches. This statistical system permits generate reports in the context of soccer teams, players and judges.</p> <p>The results of soccer matches we had to receive from one of specialized analytical agencies through REST API what was one of the biggest challenges in this project because the data provided by this agency had a lot of mistakes as well as we found a lot of errors</p>	<p>Parimatch Holding (https://Parimatch.global/) (Limassol, Cyprus)</p>

<p>in REST API. As a result we not only successfully completed development of this statistical system for Parimatch but we helped IT team of specialized analytical agency debug their REST API and fix most of errors in functionality of this REST API.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP7), PHP Framework Laravel, Vue.js, OOP, MVC, GIT, SQL, HTML5, CSS, JavaScript, DOM, XML, SPA</p>	
<p>The telemedicine system for iVisitDoc.com</p> <p>URL: http://iVisitDoc.com Duration: 3 months (05.2018 – 08.2018) Number of hours: ~ 300 hours</p> <p>Details of the project: iVisitDoc.com merges cloud-based technology, operational support, and health care dedication into a versatile telemedicine solution, designed to go above and beyond the demands of traditional hospitals and health systems.</p> <p>For iVisitDoc.com we developed the telemedicine software system that allows doctors to consult patients in a video conferencing mode. The uniqueness of this software package is the possibility of providing medical care to patients from remote regions where there are no doctors or specialists who do not have a certain specialization. In addition, the new version of the program will foresee the use of virtual reality technologies for the training of future physicians. For example, the training of future surgeons for surgery on the abdominal organs or the study of cardiac surgeons for the work of the heart and blood vessels.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP7), OOP, MVC, GIT, SQL, HTML5, CSS, JavaScript, DOM, XML, SPA</p>	<p>iVisitDoc.com (Indianapolis, USA)</p>
<p>Unilever (trademarks: Lipton, Rama, Knorr, Hellmanns, Rexona, Timotei, Sunsilk, Domestos, CIF, Brookebond etc.)</p> <p>URL: http://www.unilever.com Duration: 15 years (09.2000 – 12.2015)</p> <p>Details of the project: For 15 years we provided full cycle of Internet services for the Ukrainian office of Unilever NV company. We developed and supported their Internet projects in Ukraine. For instance, we provided web site technical support for the corporate website of Unilever Ukraine LLC, did weekly changes and updates as well as developed web sites for different promo campaigns. As an example, we developed a promo sites for such brands as Timotei, Sunsilk etc.</p> <p>Here are the several promo web sites developed by our Internet Agency in the previous years to promote Unilever's brands in Ukraine: http://site1.tangram-studio.com/ (a web shop to promote and sell</p>	<p>Unilever Ukraine LLC (Kyiv, Ukraine)</p> <p>It is the Ukrainian branch of Unilever NV http://www.unilever.com).</p> <p>Trademarks: Lipton, Rama, Knorr, Hellmanns, Rexona, Timotei, Sunsilk, Domestos, CIF, Brookebond etc.</p>

<p>Unilever's brands in Ukraine - 2000 year) http://site4.tangram-studio.com/ (Rama.ua in 2003 year) http://site51.tangram-studio.com (Sunsilk.ua in 2005 year) http://site52.tangram-studio.com (Sunsilk.ua in 2006 year) http://site53.tangram-studio.com (Sunsilk.ua in 2007 year) http://site65.tangram-studio.com/ (Sunsilk.ua in 2007 year) http://site138.tangram-studio.com (Sunsilk.ua in 2008 year) http://site73.tangram-studio.com/ (Timotei.ua in 2006 year) http://site143.tangram-studio.com/ (Timotei.ua in 2008 year) http://site59.tangram-studio.com/ (dove.com.ua and campaignforrealbeauty.com.ua promo web sites for promo campaign Dove in Ukraine in 2006 year) http://site149.tangram-studio.com/ (Axe.ua in 2008 year)</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	
<p>IBM Canada</p> <p>URL: https://www.ibm.com/ Duration: 7 months (08.2006 – 03.2007)</p> <p>Details of the project: We developed part of SEMS (Service Engagement Management System) project for IBM Customer Solution Centers. SEMS is an intranet system for automated business processes of IBM Customer Solution Centres. During this project we participated in the integration of SEMS with the warehouse management system.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>IBM Canada (Toronto, Canada)</p>
<p>Warner Home Video Canada</p> <p>URL: http://whvdirectdata.ca Duration: 6 months (02.2007 – 08.2007)</p> <p>Details of the project: We developed the "Product announcement system" project for Warner Home Video Canada. It is one of the Canadian subdivisions Warner Bros. Entertainment Inc.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), Zend Framework, OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>Warner Home Video Canada (Toronto, Canada)</p> <p>Tangram Canada Inc. signed a sub-contract with one of the Canadian IT companies which acted as an official contractor of Warner Home Video Canada.</p>
<p>Rittal GmbH & Co. KG</p> <p>URL: https://www.rittal.com/ Duration: 6 months (11.2017 – 04.2018)</p> <p>Details of the project: The main goal of this project was in migration of a huge list of Rittal's products from internal ERP system SAP Hybris into E-commerce platform Magento v2.*.</p>	<p>Rittal GmbH & Co. KG (Toronto, Canada)</p> <p>Tangram Canada Inc. signed a sub-contract with one of the Canadian IT companies which acted as an official contractor of Rittal GmbH & Co. KG</p>

<p>At the first stage of this project we planned the structure of PostgreSQL database and performed migration of products from the database of the internal ERP system SAP Hybris of Rittal into this external PostgreSQL database. The biggest technology challenge was in the migration of data from SAP Hybris because SAP Hybris does not have API or end customer did not provide any information about existing API.</p> <p>At the second stage of this project we configured the set of complicated Magento plug-ins to successfully perform import data from the PostgreSQL database into Magento database.</p> <p>We did not like the idea about migration from SAP Hybris into intermediary PostgreSQL database with future import into Magento database but for some reason it was a key requirement our customer (i.e. this Canadian IT company) so we handled it.</p> <p>Technologies: Magento v2.*, Zend Framework, LAMP (Linux, Apache, MySQL, PHP5), OOP, MVC, GIT, PostgreSQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>Rittal is a German manufacturing company, part of the Friedhelm Loh Group and at the same time Rittal is world's leading system supplier for enclosures, power distribution solutions, IT infrastructure, and software & services. Rittal is one of the top six fastest-growing German companies (Accenture), ranked 80th in the world's top market leaders from Germany.</p>
<p>Artcover GmbH</p> <p>URL: http://www.art-cover.eu</p> <p>Duration: 06.2012 — present</p> <p>Details of the project: We developed a partnership system and API for integration of their web site with different web shops worldwide. It is one of our active clients and, we continuously develop and provide ongoing support for their web projects.</p> <p>Technologies: Wordpress, LAMP (Linux, Apache, MySQL, PHP5), OOP, MVC, GIT, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>Artcover GmbH (Dietzenbach, Germany)</p> <p>This company produces and sells customized cell phone cases.</p>
<p>Tanhost HSP (Hosting Service Provider)</p> <p>URL: http://tanhost.ua, http://tanhost.ru, http://tanhost.com</p> <p>Duration: 02.2010 — present</p> <p>We developed a billing system to automate the business activity of HSP (Hosting Service Provider). This billing system is a sophisticated system integrated with numerous information systems, such as VPS/VDS (virtual servers) management software, domain name registration systems, accounting systems, monitoring systems etc. and integrated with a variety of payment gateways (PayPal, Webmoney, VISA, MasterCard) for the automation of payments made by customers through web sites.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), Zend Framework, OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>Tangram Canada Inc. (Toronto, Canada)</p>

<p>Askvisory Ltd.</p> <p>URL: http://askvisory.com/</p> <p>Duration: 7 months (11.2017 – 05.2018)</p> <p>Details of the project: We developed a business oriented social networking service with main ideas and concept of https://www.linkedin.com/ but with some additional unique features such as a secure phone system for community members etc. The innovative and secure phone system automatically handles all scheduling, call connections, payments and invoices. Clients only pay for the time they talk with an advisor.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), Zend Framework, OOP, MVC, GIT, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX, integration with Twilio REST API (https://www.twilio.com/), integration with PayPal API / PayPal Payments Pro (https://paypal.com/).</p>	<p>Askvisory Ltd. (London, United Kingdom)</p>
<p>The Business Place Ltd</p> <p>URL: http://www.thebusinessplace.com</p> <p>Duration: 2.5 years (07.2007 - 02.2010).</p> <p>Description: The Business Place is an online matchmaking service connecting investors looking to buy a business and vendors trying to sell a business, as well as brokers, banks, venture capital firms and other business suppliers. It was one of our active clients, so we provided development services and ongoing support for this client ~ 2.5 years.</p> <p>Technologies: LAMP (Linux, Apache,MySQL, PHP5), Zend Framework, OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>The Business Place Ltd (Toronto, Canada)</p>
<p>ZSA Legal Recruitment Limited</p> <p>URL: http://www.zsa.ca/ See http://site48.tangram-studio.com. It is a previous copy of this web site developed by our team in 2006 year.</p> <p>Duration: 8 months (09.2005 – 04.2006)</p> <p>Details of the project: We developed CMS (Content Managements System) on the basis Fusebox PHP Framework for corporate web site of ZSA Legal Recruitment Limited.</p> <p>Technologies: LAMP (Linux, Apache, MySQL, PHP5), Fusebox PHP Framework, OOP, MVC, SVN, SQL, xHTML, CSS, JavaScript, DOM, XML, AJAX.</p>	<p>ZSA Legal Recruitment Limited (Toronto, Canada)</p>

ABOUT THE TANGRAM GROUP OF COMPANIES

The Tangram group of companies was founded in 1999 year and specializes in providing services in the field of IT consulting, Internet business solutions, web development, software development, managed services (24/7 technical support and system administration) and hosting services (cloud based solutions, collocation services, dedicated and VPS/VDS (virtual servers)) in the best European and North American data centers.

In North America we operate as a Canadian company, Tangram Canada Inc. In Europe we operate as a German company, Tangram Internet Services GmbH and for the territory of the CIS countries and especially Ukraine we operate as Tangram Ukraine Ltd. At this moment we have five technical offices in five cities of Ukraine as well as the sales and representative offices in Toronto (Canada), Frankfurt (Germany) and Kiev (Ukraine).

Since our founding our fast growing group of companies has provided IT outsourcing advantages to reputable North American and European companies. We are a full-service web solutions, software solutions and managed services provider that offers quality IT services at fair rates.

In the previous years we developed projects for the Fortune 100 companies such as Unilever, SCA and such big companies as IBM Canada, Warner Home Video Canada (Canadian division of Warner Bros. Entertainment Inc.).

The Tangram group of companies includes the following subdivisions:

Internet Agency "Tangram"

A full cycle Internet agency. Our agency provides quality web design and web development services at fair rates. Services include:

- Web development;
- E-commerce solutions development (web shops, auctions, E-commerce projects);
- LAMP (Linux, Apache, MySQL, PHP) programming;
- MEAN stack of technologies (MongoDB, Express.js, Angular, Node.js)
- Python and .NET programming;
- UI development and customization;
- Creative web design, web sites re-design;
- Hosting solutions and domain name registration;
- Internet marketing & advertising (SEO (search engine optimization), PPC (pay-per-click advertising), SMO (social media optimization)).

Hosting Provider "Tanhost"

- Cloud based solutions (e.g. configuration and technical support of Private Clouds) in the best European and North American data centers;
- Dedicated servers, Collocation, VPS/VDS in the best European and North American data centers;
- Shared Hosting in the best European and North American data centers;

- Domain names registration services in more than 100 international zones;
- SSL Certificates selling and supporting SSL certificates for banks, cell phone service operators and other companies.
