 - Managed full-stack programming tasks for the development of the single-page application. As a result, 9 bugs-free releases have been deployed just in time.
 - Revamped UI, UX, and overall design aesthetic of the business-critical customer-facing portal, resulting in an 84% increase in sales and product revenue.
 - Reviewed the quality of code and design consistency across different team members.
-

NERI AGENCY / NOV 2016 - JAN 2017 / WEB DEVELOPER (REACT & VUE)

- Created a web app using React and Vue that served as a note which you could use anywhere.
 - Fixed bugs from existing websites and implemented enhancements that significantly improved web functionality and speed
 - Designed Rest calls using React to streamline user interface performance.
 - Revised, modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
-

GENESIS TECH / MAR 2017 - DEC 2019 / WEB APPLICATION DEVELOPER

- Discusses technical and design issues with other developers, managers, users or customers whenever necessary to achieve best solution.
 - Integrated with third-party services and external APIs as a part of the implementation of the mission-critical single page application resulting in a decrease in the system's complexity.
 - Participated in peer code reviews for the mission-critical single page application ensuring compliance with the company coding standards
-

MODUS CREATE / OCT 2019 - FEB 2021 / FULL STACK DEVELOPER (REACT & SPRING BOOT)

- Developed UIs using React javascript and typescript.
- Interfaced with 10 customers per month to gather requirements and resolve issues.
- Participated in the full lifecycle of development for company web applications using JS framework including React, Vue and Next
- Developed app integration with REST and other APIs for Google Maps, social medialogins, payment processors, and other services such as algolia, mailgun.
- Maintained and improved the client portal React application.

QUALIFICATION

Technician programmer / OCT 2013

Donetsk National University

CAREER

Why did I become a developer?

Not only me but also many people want to keep them to create something, learn new stuff and evolve, challenge new things. And I am one of them.

I thought becoming a software developer is undoubtedly one of the best career choice someone can achieve above things.

This leads me to here, +5 years of developer career.

What is important in my next job?

The most important points in my next job are a collaborative, opportunities to learn and grow my skills from a technical standpoint, and a chance to challenge and learn more skills over time.

PROJECTS
